

Data-Driven Innovations in Supply Chain Management with Qlik Insights

Performance Testing:

Amount of Data Loaded: "Amount of Data Loaded" refers to the quantity or volume of data that has been imported, retrieved, or loaded into a system, software application, database, or any other data storage or processing environment. It's a measure of how much data has been successfully processed and made available for analysis, manipulation, or use within the system.

Benefit per order	Hour	Order Status
Category	ip	Order Zipcode
Category Id	Late_delivery_risk	Product
Category Name	Latitude	Product Card Id
🌐 Customer City	Longitude	Product Category Id
Customer Country	Longitude_Latitude	Product Description
Customer Email	Market	Product Image
Customer Fname	Month	Product Name
Customer Id	🌐 Order City	Product Price
Customer Lname	🌐 Order Country	Product Status
Customer Password	Order Customer Id	Sales

Utilisation of Data Filters:

"Utilization of Filters" refers to the application or use of filters within a system, software application, or data processing pipeline to selectively extract, manipulate, or analyze data based on specified criteria or conditions. Filters are used to narrow down the scope of data, focusing only on the relevant information that meets certain predefined criteria.
